

In May, we focused on the topic of NICU design and on how to welcome parents to neonatal units. We asked healthcare professionals and parents what needs to be considered when designing a neonatal intensive care unit. We launched a factsheet and new website content providing information for parents in the NICU. One of our partners successfully advocated 24/7 opening hours for parents in their country. Welcoming parents in neonatal units is possible. Let's put it into practice together.

Your EFCNI team

## Parents of Premies Day 2016

The first Sunday in May is dedicated to parents of preterm born infants. On *Parents of Premies Day*, individuals, organisations, and hospitals realise countless activities dedicated to parents of preterm infants. This year, EFCNI created a social media series featuring the ten most important rights of parents and newborns. EFCNI has developed these rights in close collaboration with partnering parent organisations. We also published a new [factsheet](#) and website content on [Parents in the NICU](#). In a very personal [interview](#) EFCNI's Chairwoman Silke Mader spoke about her experiences as a mother of a preterm child in the late 90s.

## Review on Parents of Premies Day by Graham's Foundation

1 May 2016 marked the fifth annual Parents of Premies Day, the global day of awareness created by [Graham's Foundation](#) to recognise the courage and commitment it takes to stay strong when a preterm birth turns a family's world upside down. Christa Terry from Graham's Foundation gives a short recap on their activities.

## Interview with a mother of a preterm baby

On the occasion of Parents of Premies Day, we spoke to Mindy, mother of four. One of her children was born preterm. In the interview Mindy describes her experiences during her son's stay in the NICU.

## EFCNI at the SHIPS project meeting

From 14 to 15 March 2016, the team of the SHIPS research project organised the second project meeting in Porto, Portugal. EFCNI gave a presentation about the involvement of parent representatives in the research project assessing the impact of follow-up screenings and prevention programmes in preterm born children.

## New content on the EFCNI website

During the last weeks, we launched new content on the EFCNI website. We proudly present the new section on *Parents in the*

NICU including a factsheet for (affected) parents for free download. Another new section deals with *The neonatal intensive care unit* including a description of the equipment in the NICU.

From Louise with love - letter to

## French deputies

The French parent organisation *SOS Préma* has realised two remarkable projects to raise awareness for this topic respectively to improve the situation for preterm born infants: a moving postcard, written by the preterm born baby Louise (born at 26 weeks of gestation), and a two-day advanced training with 300 participants from all across France.

## Vivere Onlus achieves 24 hours parental access to Italian NICUs

*Vivere Onlus* is an Italian national coordination of associations for neonatology. In February, they held the first joint assembly, a major two-days work meeting in Padua, Italy. In addition, in May, the *Italian Ministry of Health* signed a recommendation paper which had been developed by the *Technical Operating Table for the promotion of breastfeeding (TAS)*, the *Italian Society of Neonatology (SIN)*, and *Vivere Onlus*. This effected a change towards 24 hours parental access to Italian NICUs. Congratulations!

## New research on labour induction

A new study by Walker and colleagues was published in the *New England Journal of Medicine*. The research group conducted a randomised, controlled trial involving pregnant women at 35 years of age or older to investigate the caesarean section rate following labour induction.

[View more](#)

## Launch of the SHIPS webpage

*SHIPS* is a new European research project that aims to improve

follow-up programmes for children born very preterm by studying their impact on the children and families followed in the *EPICE* cohort. EFCNI is contributing to the *SHIPS* project by providing a link between researchers and parents. Visit the new project website for more information about the study, the *EPICE* cohort, the participating regions, and latest research results from the study.

## Study on mothers' experiences with expressing breast milk

Ikonen and colleagues recently published a study in the *American Journal of Maternal/Child Nursing* describing mothers' experiences with expressing breast milk for preterm infants or infants small for gestational age. They concluded that expressing breast milk should be considered as a helpful factor for mothers and that the separation between mother and infant should be avoided.

## Recommendations for psychological support of NICU parents

Under the lead of Guest Editors Sue L. Hall, MD, MSW, FAAP and Michael T. Hynan, PhD, the *Journal of Perinatology* publishes a set of recommendations on the support of parents and staff working in the NICU. The recommendations were developed by a workgroup of multidisciplinary professional organisations and NICU parents. The articles are published as open access articles that can be read and downloaded without a subscription to the journal.

## Update of webpages for patients and consumers

The *European Medicines Agency* (EMA) is pleased to announce an update to their webpages dedicated to *patients and consumers*. The aim was to update the content, highlight existing helpful information as well as to launch the ongoing series entitled '*EMABasics*' in the *training and resources section*.
