The European Foundation for the Care of Newborn Infants (EFCNI) is the first pan-European organisation and network to represent the interests of preterm and newborn infants and their families. It brings together parents, healthcare experts from different disciplines, and scientists with the common goal of improving long-term health of preterm and newborn children. EFCNI’s vision is to ensure the best start in life for every baby.

To strengthen our Munich team we are looking for a

Director Education and Research (f/m/d) / full-time position

Your responsibilities:

• Strategic development of the foundation's medical education programme (EFCNI Academy) in close cooperation with the foundation's leadership and scientific team
• Independent conception and moderation of seminars and workshops (within the framework of the EFCNI Academy)
• International networking in the medical professional world and expansion of the existing network
• Strategic development of the scientific area of the foundation and establishment of a separate research area in close cooperation with the foundation's management and scientific team
• Conception and implementation of the foundation's own research proposals
• Steering and managing foundation activities as a partner in research projects (H2020)
• Central contact person for key opinion leaders in the field of medical and science as well as for the top management level of large international companies
• Developing and writing publications, interdisciplinary research as well as evaluation and target group-specific preparation (patients and experts) of various specialist texts, information and research results on foundation- and project-relevant topics in German and English
• Representation of the foundation and in particular the patient's voice at international congresses, conferences and EFCNI relevant events

Your qualifications:

• Completed further training as a specialist (f/m/d) for paediatrics and neonatologists
• Experience in prenatal diagnostic and neonatal intensive care
• Proven experience in scientific work (e.g. through empirical thesis)
• Experience in the implementation of externally funded projects
• Experience in the dissemination of scientific projects
Good methodological presentation and moderation skills aimed at a wide variety of committees, in German and English

Excellent English (mother tongue level) as well as good German language skills (at least B2 level) are required

Target group oriented, committed and innovative work ethic

Intercultural sensitivity and creative thinking across teams

Strong social skills and empathy

Strong organisational and communication skills

Experience in working in an office structure

What we offer:

An unusual working environment in a foundation that is passionate about finding answers to societal issues of neonatal health as well as constantly trying to ensure sustainable improvement for the care of pregnant women, premature babies and newborns worldwide

A diversified role with international orientation and the freedom to contribute your own ideas and experiences

The opportunity to actively support the maintenance and expansion of our international network with patient and parent representatives as well as experts from politics, research, business and professional associations

A small but strong team that shares an open culture of discussion and celebrates its growing successes together

Flexible working hours and a salary appropriate to the job and knowledge

Are you interested? We are looking forward meeting you. Please send your complete application (cover letter, CV, certificates) * with salary expectations and the earliest possible date of entry to career@efcni.org. Please note that we cannot process incomplete applications.
