

The European Foundation for the Care of Newborn Infants (EFCNI) is the first pan-European organisation and network to represent the interests of preterm and newborn infants and their families. It brings together parents, healthcare experts from different disciplines, and scientists with the common goal of improving long-term health of preterm and newborn children. To strengthen our team we are looking for a

Senior Medical Director (f/m/d)

Maternal and Newborn Health (part-time or full-time/remote possible)

Your Responsibilities

- Advise on and strategic development of the medical and scientific area as well as the medical education programme (EFCNI Academy) of the foundation in close cooperation with the foundation's management and scientific team
- Conception and implementation of the foundation's own research activities
- International and interdisciplinary project management, e.g. conceptualizing, and drafting scientific manuscripts, development of position papers or manuals, in cooperation with international key opinion leaders from medicine, science and health practice
- Central contact person for key opinion leaders in the field of medical and science as well as for the top management level of large international companies
- Independent preparation and moderation of seminars and workshops on medical and scientific topics
- Representing the foundation and in particular the patient's voice in international and EU-funded research projects as well as at international congresses, conferences and EFCNI relevant events
- International networking in the medical and scientific professional world and expansion of the existing EFCNI network

Our Offer

- Permanent employment contract, flexible working hours and possibility to work remotely
- An attractive position where you contribute actively and with your own ideas to the care of newborn infants in Europe and worldwide
- A dynamic and highly motivated team with a flat hierarchy and short decision-making paths
- A large international network with medical associations, parent and patient organisations, policy makers and industry partner

Your Qualifications

- Medical degree and several years of practical experience in paediatrics and neonatology, with focus on neonatal intensive care
- Proven experience in scientific work (e.g. through empirical thesis)
- Several years of experience in international and interdisciplinary project management (and qualitative/quantitative research) is essential
- Proven leadership experience of interdisciplinary teams
- Experience in working in an office environment
- Independent, structured and result-oriented way of working, as well as a high level of commitment and team spirit
- Excellent written and oral communication skills in English (and preferably German as well)
- Very good presentation and moderation skills geared towards a wide variety of target groups in English
- Social and intercultural competence as well as the ability to put yourself in the parents' position
- Experience in working with multiple stakeholders, including academics, scientific and healthcare experts, patient organisations and relevant professional/interest groups
- Willingness to travel nationally and internationally
